PROFESSIONAL PROFILE

Information Engineering student specializing in analog/digital circuit design, hardware prototyping, and automated measurement systems. Proficient in benchtop instrumentation, LabVIEW data acquisition, MATLAB analysis, and PSpice modeling. Positioned for electrical engineering roles requiring hands-on laboratory experience and hardware-software integration.

EDUCATION

B.Sc. in Information Engineering
HAW Hamburg

Aug 2022 – Present
Hamburg, DE

- **Focus:** Electrical Engineering I & II, Signals & Systems II, Digital Circuits, Electronics I & II.

Mechanical Engineering (Erasmus)
Kiel University of Applied Sciences

Sep 2021 – July 2022
Kiel, DE

- **Focus:** Structural Design, Project Management, Mechanical Systems Analysis.

Mechanical Engineering
Yildiz Technical University

Aug 2019 – July 2022
Istanbul, TR

- **Focus:** Core engineering principles, CAD, and manufacturing processes.

TECHNICAL PROJECTS & LABORATORY EXPERIENCE

Automated Measurement & AC Analysis

Electrical Engineering 2 Lab

- Developed virtual instruments using LabVIEW for automated data acquisition (DAQ) and signal processing.
- Interfaced hardware with software to automate benchtop measurements and log transient data.
- Analyzed advanced AC circuit behavior, complex power components, and frequency responses.

Analog Circuit Design & Prototyping

Electronics 1 & 2 Labs

- Characterized passive networks and non-linear semiconductor devices (diodes, BJTs, MOSFETs) via I-V curves.
- Designed and breadboarded differential amplifiers, operational amplifiers, and linear voltage regulators.
- Evaluated power dissipation, signal gain, and load/line regulation metrics.

Digital Logic Systems Design

Digital Circuits Lab

- Designed and built a Smart Home logic controller utilizing combinational logic gates.

- Implemented hardware adders (half, full) and synchronous/asynchronous counters.
- Measured physical digital characteristics, including propagation delays and noise margins, using oscilloscopes.

Circuit Simulation & Instrumentation

Electrical Engineering 1 Labs

- Simulated complex network topologies, including Wheatstone bridges, using PSpice and LTspice.
- Conducted transient and DC/AC sweep analyses to validate theoretical hardware behavior prior to prototyping.
- Operated benchtop equipment (oscilloscopes, function generators, DMMs) for troubleshooting.

PROFESSIONAL EXPERIENCE

Founder

Aug 2021 – 2023

International Speaking Club

Remote

- Managed an international English-speaking organization, moderating daily communications and organizing events.

Project Team Representative

Sep 2020 – June 2021

Yildiz Technical University Business Club

Istanbul, TR

- Coordinated cross-functional events connecting engineering students with industry stakeholders.

SKILLS

Hardware & Instrumentation Oscilloscopes, Signal Generators, DMMs Breadboarding & Component Characterization Data Acquisition (DAQ)	IT & Programming C, Java, Python, SQL GenAI (Gemini, ChatGPT) Google Workspace, MS Office
Engineering Software MATLAB, LabVIEW, Code Composer Studio (CCS) PSpice, LTspice, AutoCAD, Fusion 360	Spoken Languages Turkish: Native English: C1 (Fluent) German: B2 (Fluent)
